

# AVE EV CHARGING WITH FLASH AX SERIES EV!

AVE is excited to offer residents access to EV charging right at home. Learn more about how to use FLASH EV Charging.

## FEATURES AND BENEFITS

- Flexible plug-and-play solution
- Efficient back-end management
- Automatic energy balance
- Reduced environmental pollution
- Reduced charging downtime
- Transforming parking assets into dynamic mobility hubs

## HOW TO USE

- Scan the QR code on charger display screen or label to initiate your Charging Session.
- If prompted, follow the instructions on your phone for your account setup. There is no app download required.
- You will see the charger site details and rate associated with charging session.
- Press “Activate Charger” to begin charging session.
- Upon successful activation, you will see the “Ready to Connect” screen. Connect port to EV.
- To end the charging session, disconnect the charging port and return to holster. You will receive SMS text confirming charging session termination, kWh of energy consumed, and total cost of the session.
